Low-cost Single Touch Payroll solutions

We expect to see a range of simple, low-cost Single Touch Payroll (STP) solutions available in the market from early 2019. These solutions will best suit micro employers (with one to four employees) who need to report through STP, but do not currently have payroll software.

In response to the market request by the ATO, 31 companies have put forward product proposals to offer low-cost STP solutions. The solutions are required to be affordable (costing less than \$10 per month), take only minutes to complete each pay period and not require the employer to maintain the software.

These solutions may include mobile apps, simple reporting solutions and portals.

We have published a list of the companies intending to offer these solutions below. We will update this list in December 2018 to include information about the products these companies will offer.

While we will take all reasonable care to ensure information provided in this list is accurate, changes in circumstances may occur after the solutions are released which may affect the accuracy of this information.

The list is ordered alphabetically for convenience and does not imply any preference. The ATO does not endorse any of the suppliers listed:
